

TAKE BACK YOUR HEARING

I am not one to promote anyone's business, but this company called Integrity Hearing Aid Solutions, is a top-of-the-line hearing store. John J. Acito and his Son Devin A. Acito, hearing instrument specialists, sell Siemen's hearing aids. They have the top-of-the-line hearing aids for us hearing impaired.

They most certainly stand by the truth behind their name Integrity, which is a powerful statement to live up to this reputation. Let me explain.

I came to John's store back in 2011, and I have really bad military hearing loss. The world around me was starting to close in on me. I was frustrated to the point I would withdraw from people for I could not understand them, and for so many years without good hearing, my mind fell asleep to a lot of words. I was tired of being a burden and embarrassed to keep asking people to repeat themselves, so my friendships suffered and the world around me was lonely.

Then I went to Integrity Hearing - what patient and kind people! Many times I would come into John's store with an issue. I would just lose faith at times, saying the only thing these hearing aids do is amplify sound. But I would go back to John's store, and I would always leave hearing better, and very happy. Remember what I said that my mind was asleep to a lot of words, but the more I wore them and went to John's for adjustment, the better I was hearing, and over time my mind started to pick up a lot of words, that where asleep.

I must say I did buy the top of the line for the type of hearing loss I have. So it is true you get what you pay for. But the best above the money is the friendship, and kindness, and support from, John, and His son Devin.

Now here is the best part, after three years, Siemens, came out with even a better pair of hearings aids called (Pure Mi 7s), and wow! Are they ever better, Technology has sure come a long way. The best way to have these top of the line hearings explain to you is, go and visit Integrity hearing in Carlisle or Devin in Mechanicsburg, I promise you, that you will not be disappointed.

John, I want to thank you and Siemens, for a great pair of hearings aid. I went to a wedding, and with the music and people all around talking came the true test of the hearing aids, with the auto speech focus in my hearing aids really stun me, how well I was understanding the conversation, from across the table, and very little repeat.

Now outside in a loud crowd they are even better, for of course even people with good hearing are going to have trouble in crowds. It is like having my hearing given back to me. I now don't have to have my wife keep repeating words. And the best part since they are water proof and dust proof. I can walk and ride my ten speed bike and hear my surroundings, and don't have to worry about the sweat or rain ruining them.

So if you are in search of a company for better hearing then you need to go to Integrity Hearing, John in Carlisle or his son's store in Mechanicsburg, for their great honesty and Integrity. Integrity Hearing Aid Solutions is for you, and I promise you will be very satisfied.
